

## Acorn Daycare – Private Instagram Consent Form

We have a private instagram account for Acorn. It will be used by the staff to post photos and videos of the children and what we are doing during the week. We hope that the content can help spark meaningful conversations with your children about what they have done during the day! We may also share content from other accounts of tips or advice that we think parents may find interesting.

- Only current parents will be allowed to follow the account and once your child leaves Acorn you will be deleted from following within 7 days.
- Images will not be shared on any other social media platform.
- We require that parents do not share any Acorn image that includes a child other than their own.
- If you are concerned about a particular image please inform Marina and the image will be removed.
- We will not label images or videos with children's names and we will not tag children or parents to images.

If you wish to follow the account which is @acorn8oaksdaycare please also reply with your instagram name so we know to accept you. If you do not have an account, it is a free app and making an account is quite easy (Download instagram from the app store or google play store. Open the instagram app and click sign up and follow the instructions).

Please fill out this consent form allowing your child's photo to be on the private Acorn instagram (@acorn8oaksdaycare) account.

I consent for my child, \_\_\_\_\_, to be on the private Acorn Instagram account:

Yes     No

Parent's name: \_\_\_\_\_
